

a framework for multimedia artistic
interactivity experimentation

Terms of Use - User Interface Software

Version 1.0.0 | April/2017 | Ricardo Scholz

marine user interface is a module built over marine framework, as part of my PhD research, resulting from a process of investigation about UI requirements and guidelines for some of the features developed on marine framework. The idea is providing an easy-to-use interface for artists to improve experimentation with motion tracking devices.

Therefore, if you decide to use marine user interface for artistic purposes, research or anything else, I kindly ask you to comply with the original marine framework terms of use, as well as the following terms of use:

1. **The use of this software for producing commercial spectacles DO is allowed;** however, this software and any derivative software must NOT be sold, in any way, including by software-as-a-product or software-as-a-service business models.

2. This is a free and open source software, under the Creative Commons Attribution Non-Commercial Share Alike License, meaning that commercial use is NOT allowed, while derivations of the work DO are allowed, as long as appropriate credit is given and the resulting work license is not more restrictive than this license;

a. Creative Commons Attribution Non-Commercial Share Alike License is available at <https://creativecommons.org/licenses/by-nc-sa/4.0/>

b. Creative Commons Attribution Non-Commercial Share Alike License legal code is available at

<https://creativecommons.org/licenses/by-nc-sa/4.0/legalcode>

c. As appropriate credit mechanisms, one of the following must be considered:

I. Identification of the creator on digital and physical media which make reference to the products created with this software, as “marine framework, Ricardo Scholz” or similar;

II. Any other format discussed directly with the creator (contact@marineframework.org).

3. You must comply with this Terms of Use, as well as the third party softwares and libraries which are embedded in marine framework;

a. The copies of third party terms of use provided at marine framework repository may be out of date; it is your responsibility to check out the most up to date terms of use available, from official sources, for all third parties software embedded in marine, including, but not limited to:

- i. EyesWeb (http://www.infomus.org/eyesweb_ita.php)
- ii. J4K Library (<http://research.dwi.ufl.edu/ufdw/j4k/>)
- iii. Processing (<https://www.processing.org/>)

4. It would be kind to inform the author about any artistic works produced using this software, by dropping a line to "contact@marineframework.org";

a. This is for the author's personal records and may be published at marine web page gallery; if you do not want the author to publish this information, please, make it clear on your message;

b. This message is NOT intended to make users ask for any permission to conceive and/or publish their work; as stated on items 1 and 2, you are free to conceive and/or publish your work, at any time, anywhere.

5. If you are using this software for research, please include the following citations on your work, and, if possible, drop me a line at "contact@marineframework.org":

[marine has not been published as academic work yet; this document will be updated when it occurs]

a. If you mention marine user interface or marine framework itself (apart from marine user interface) or if you just want to add a reference to marine framework itself, please, use the following reference:

[marine framework has not been published as academic work yet; this document will be updated when it occurs]

6. You may NOT redistribute code which modifies original source code, although you can redistribute code which expands the original source code, as long as you follow all other mandatory requirements of this document.

7. This software is available AS-IS, and under no circumstances is its creator liable in any way for any content or damage caused by its use, including, but not limited to: any infringing content, any errors or omissions in content, any loss or damage of any kind incurred as a result of the use of this software or any content accessible through or made available via this software.

Ricardo Scholz.
